# Scrap Tire Disposal Changes Starting July 1, 2025

Coastal Regional Solid Waste Management Authority will require new documentation beginning on July 1, 2025 to qualify for free scrap tire disposal at any of its facilities (Tuscarora Landfill, Grantsboro Transfer Station, and Newport Transfer Station).

What must I do to for my business to qualify for free disposal of scrap tires at CRSWMA facilities after July 1, 2025?

- 1) Provide a completed new NCDEQ **Scrap Tire Certification Form** (attached). This form is specific to each load of tires and must be provided to the scale house at the time of disposal. Parts 1 and 2 must be completed as per the instructions. ***If there is no form provided at the time of disposal, or if Parts 1 or 2 are incomplete, that particular load of tires will be charged the scrap tire disposal fee of \$165/ton.*** Additional copies of this form are available on our website: [www.cepnc.org/forms](http://www.cepnc.org/forms) and from NCDEQ's website: [www.deq.nc.gov](http://www.deq.nc.gov).
- 2) If the tires are being delivered by a Scrap Tire Hauler and not the generator, in addition to the Scrap Tire Certification Form in #1, the hauler must show their valid **Scrap Tire Hauling Identification Certificate** issued by NCDEQ. ***If the hauler does not provide their certificate, that load of tires will be charged the scrap tire disposal fee of \$165/ton.*** If you need a copy of your Scrap Tire Identification Certificate or if you need to apply to become a certified scrap tire hauler, you will need to fill out NCDEQ's application: [https://edocs.deq.nc.gov/Forms/wm\\_tirehauler](https://edocs.deq.nc.gov/Forms/wm_tirehauler). If you are a scrap tire generator that hauls your own tires, you don't need to provide the Hauling Identification Certificate.
